You don't need to follow a complicated diet in order to start eating right, there are some simple things you can swap out in order to make your diet healthier. It might seem challenging, but small changes can add up.

Here are some simple tips:

- * Slow down. Be aware of how full you feel when you are eating, when you feel full take that as your cue to be done with your meal.
- * Drink enough water for the day, make sure you always have a refillable bottle with you.
- * Bake or roast instead of grilling or frying.
- * Make sure you eat a vegetable at lunch and dinner.
- * Eat from small plates.

Some simple swaps help make a difference too!

- * Add fresh fruit to your peanut butter sandwich instead of jelly.
- * For a party consider a fruit and cheese plate rather than chips and dip.
- * Instead of ice cream try a cup of berries with whipped cream on top.
